2026-07-11T19:45:29.572Z [info]: PostgreSQL (Neon) connected via

Show more

📄🔗

Great! This log tells us the **exact problem**. It's **not PostgreSQL**, **not Prisma**, **not LangGraph**, and **not Gemini**.

The pipeline is failing at the **very first AI tool**.

✖ Error

[CompanyResearchAgent] Fetching profile for "Apple"

yahooFinance.search is not a function

📄

This is the root cause.

Because the first node fails, the graph falls back to the default report, which is why you're seeing:

i deployed frontend on vercel and backend on render but when am registering Access to XMLHttpRequest at 'https://investment-research-agent-api.onrender.com/api/auth/register' from origin 'https://ai-investment-research-agent-for-in.vercel.app' has been blocked by CORS policy: Response to preflight request doesn't pass access control check: The 'Access-Control-Allow-Origin' header has a value 'https://investment-research-agent-black.vercel.app' that is not equal to the supplied origin.
investment-research-agent-api.onrender.com/api/auth/register:1
Failed to load resource: net::ERR_FAILED

📄✎

The error already tells us the exact problem.

Your frontend is deployed at:

https://ai-investment-research-agent-for-in.vercel.app

📄

But your backend is allowing only:

https://investment-research-agent-black.vercel.app

📄

So Render is returning:

Access-Control-Allow-Origin:
https://investment-research-agent-black.vercel.app

📄⬇️

while your request comes from:

+ Ask anything

🔊🔊

where can i see Tables user research etc in neon dashboard in step 12

You're actually one step ahead. 😊

The tables **do not exist yet** because you **haven't run the migration**.

Right now your Neon dashboard is showing an **empty PostgreSQL database**.

Why don't you see the tables?

Currently, the flow is:

Created Neon Project ✓

↓

Connected Prisma ✓

↓

Ask anything
